

Product & AI Software Engineering

6 MONTH PROGRAM

BUILD FROM IDEA TO PRODUCTION

Learn the complete product engineering journey, from shaping an idea and designing the experience to building, testing, and deploying production-ready applications with AI in your workflow.

01 DESIGN TO DEVELOPMENT

Turn product requirements and designs into functional applications using modern development practices.

02 AI-ASSISTED ENGINEERING

Use AI to plan, write, debug, improve, and document your code throughout the development lifecycle.

03 TEST, SHIP & ITERATE

Learn testing, deployment, monitoring, and iteration to take products from development to real-world use.

INTERNSHIP OPPORTUNITIES

Eligible learners will have the opportunity to undertake a 3-month internship after completing the course.
